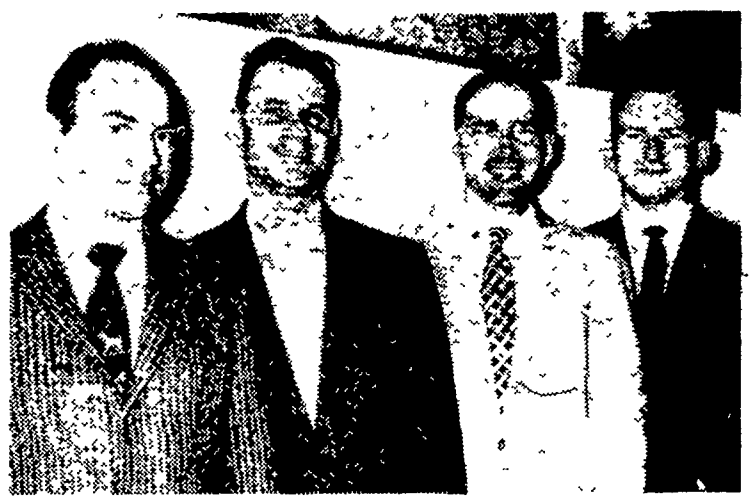
New D.H.I.A. Directors



THREE NEW DIRECTORS of the Red Rose Dairy Herd Improvement Association pose with the winner of the high herd award at the annual banquet of the association. Directors are L to R, Kenneth Skiles, Narvon R2, John J. Oberholtzer, 171 Newport Road, Leola, and Irwin Musser, Mount Joy R1 Far right is J. Mowery Frey, Jr., Hans Herr Drive, Lancaster R7, whose herd of purebred Holsteins produced an average of 600 lbs. of butterfat during the year to take first place in the association for the second consecutive year. The banquet was held Thursday at noon in the Hotel Brunswick. —L.F. Photo

County Tobacco Company Contracting In Kentucky

About 300 acres of Lancaster Seedleaf (Type 41) tobacco were grown in Washington County, Kentucky last year under contract with a local tobacco company.

A story in the Louisville (Kentucky) Courier-Journal for January 8, quotes a Lancaster County cigar company official, Paris Gruber, as saying "Continued urban encroachment on farmlands is causing acreage to dwindle" in Lancaster County.

The story continues, "The tobacco is grown here on a kind of contract basis with the company which supplies farmers with the seed and then buys the tobacco."

The story credited Gruber with saying, "there are about 300 acres of the tobacco being grown in the six-county area in Kentucky. He said officials of his company selected Washington County area to introduce the crop here because the land is most nearly like that in Pennsylvania and the farmers here are familiar with tobacco growing"

"Pennsylvania filler growers have always rejected marketing quotas or acreage restrictions on their crops," the story continued, "and will vote again on a control program for the 1962 crop. Gruber said his company is not interested in any more growers now."

The Courier-Journal's farm editor interviewed some of the farmers who have been growing the Lancaster County tobacco in addition to their Burley allotment. One of the growers, William Smith hopes it will be a successful crop. He was quoted as saying "I can't put anything

Poultry Disease Meeting Set By York Assn.

All poultrymen of Lancaster County have been invited to attend the joint meeting of the York-Adams poultrymen on January 23.

The Poultry Outlook, the latest on Leucosis, vaccines, use of records and egg marketing regulations will be subjects for discussion by experts in the poultry field.

Carl O. Dossin, Extension poultry specialist from the Pennsylvania State University will lead off the program at 10 a.m. in the Caterpillar Tractor plant on Rt. 30 just east of York.

Other speakers will be Dr. Robert F. Gentry of the department of veterinary science at PSU; James T. Hall, farm management specialist from PSU, and Edward Lawless of the Bureau of Markets, Harrisburg.

Purebred Stock Associations Listed In Book

The National Society of Live Stock Record Associations has published a directory of the Purebred Livestock Registry Associations, listing the secretary and addresses of the Associations of Beef and Dual Purpose Cattle, Dairy Cattle, Draft Horses, Light Horses, Ponies Sheep, Goats and Swine These are now available for free distribution.

To those interested in Purebred Livestock, this booklet furnishes the names and addresses of the breeds from which free literature may be obtained, and serves as a very useful reference to all segments of the Livestock industry. The directory should be of much interest to members of 4-H and FFA chapters.

Mail requests to Allan C Atlason, Secretary, 3964 Grand Avenue, Gurnee, Ill.

Frey Herd Tops DHIA With 600 Pounds Fat

J. Mowery Frey, Jr, Hans Herr Road, Lancaster R7, was awarded a plaque and a gold rosette for having the highest herd average in the Red Rose Dairy Herd Improvement Association testing program in 1961 at the annual banquet of the association, Thursday.

Frey's herd of 34 purebred Holstein cows produced an average of 15,082 pounds of milk and 600 pounds of butterfat per cow during the testing year.

Following closely in second place was the herd of 45 purebred Guernseys owned by Raymond F. and Louise A. Witmer, Willow Street R1. With an average of 595 pounds of butterfat in 11,662 pounds of milk per cow, the Witmer herd held the same relative position with the Frey herd as last year

Holding third position, as it did last year, the registered Holstein herd of Paul B. Zimmerman, Ephrata R1, produced 565 pounds of butterfat in 14,922 pounds of milk.

Fourth and fifth positions were reversed from last year with the herd of Hiram Aungst, Elizabethtown R1 averaging 565 pounds of but-

Producers Cooperative Exchange To Vote On Merger Proposals

Stockholders in the Producers Cooperative Exchange will be asked to vote on proposals to turn over the management of the cooperative to a larger cooperative at a special meeting next week.

The board of directors of the Producers Cooperative, known locally as Coatesville Egg Auction, have called the special meeting for 8 p.m., January 23 in the Pequea Valley High School.

Stockholders will be asked to consider resolutions relating to ratification and effecting the boards action in considering the proposal of Pennsylvania Farm Bureau Cooperative Association to acquire the assets and liabilities of Producers Cooperative Exchange and to operate the business of the exchange.

The action of the board was taken in December of last year after the poultry

Funk Elected To 10th Term By County SCD

Amos Funk, Millersville R1, was reelected Monday night, to his 10th consecutive term as chairman of the Lancaster County Soil Conservation District Directors.

Funk, who was elected first to replace Arthur E. Brown, Nottingham R2, the

AMOS FUNK

first chairman of the district, in 1951 has served every year since.

Brown, who served one year as chairman of the newly-organized district, was named the Oustanding Con-

(Turn to page 4)

4-H Leaders Name Directors

Five new directors were elected and five were reelected by the Lancaster County 4-H Leaders' Council Monday night.

The council elects one home economics club leader and one agricultural club leader from each of five county districts to act as a board of directors.

From the Southeast district both members were newly elected to office. They are Mrs Earl Kreider, Quarryville R1, and Wilbur Houser, Lampeter.

New directors from the Northeast district are Mrs. Herbert Royer, 2025 Oregon Pike, Lancaster, and Chester Nolt, Bareville.

Daniel Trimble, Quarryville R1, was elected and Mrs Charles Woods was reelected to represent the Southern district

From the Southwest district both Mrs Kenneth Musser, Columbia R1 and Richard Lefever, Quarryville R1, were returned to office as were Mrs. Hoxie Thomas, of Manheim, and Mylin Good, Manheim R1

A reorganization meeting will be held later this month.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures during the next five days are expected to average two to ten degrees below the normal range of 24 at night to 39 in the afternoon. Continued cold is expected thru most of the period except some moderation Monday or Tuesday. Precipitation may total ½ inch or more, melted, falling as snow Saturday and a chance of rain or snow again about Wednesday.

At Lancaster Yards

Steady to .25 Higher

CATTLE: 3475 Compared with 3074 head last week. Supply includes 40 per cent slaughter steers, 50 percent stockers and feeders. Trading moderately active, except stockers and feeders were slow Slaughter steers steady to 25 higher, Cows 25 lower, Bulls steady, 50 lower. Stockers and feeders steady.

Feed Your Home Grains and Save Money

But . . . for better feeding, mix them with

RED ROSE®

32% DAIRY SUPPLEMENT

Dairymen use high protein Red Rose 32% Dairy Supplement with their home-grown grains because it contains many milk making properties and nutrients necessary to the cow's diet not found in grain and roughages. When you use Red Rose 32% Dairy Supplement with your grains you can mix rations of your own choice to fit the roughage you have available on your farm They will be dependable, palatable rations, too, because all the needed proteins, vitamins, minerals, growth factors, and other nutrients were included in the Red Rose Supplement

Highest In Over A Year

Broilers averaged over 20 cents per pound for the first time since last February and the 20 43 average at the January 18 auction was higher than at any time during 1961. The sale average on 24,400 broilers in seven lots was almost three and a half cents above the 17 05 average of last week.

The high lot of broilers was 1,000 white vantress at 10 weeks, consigned by Miller and Bushong, and Glenn R Siegrist and bid in at 21 1 by Carl B Risser. All broilers on offer were sold. Three lots of roasters failed to sell at the bids of 19 to 21 9

Two lots of 5,500 leghorn fowl brought 8 to 8 5 while two lots of roasters containing 1,700 roasters sold at 24 2 per pound.

The complete sale offered 37,600 head in 14 lots and sold 31,600 birds in 11 lots. Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price

CODE: WV - white vantress, IR - indian rivers, LC - ledbrest cockerels, C - cockerels, P - pullets, L-F - leghorn fowl, HWSXC - hubbard's white silver cross cockerels.

Delmarva - Georgia

Prices Highest Since February

Delmarva reported live broiler prices averaged more than one cent higher to the highest level since February 20, 1961. Prices of 18.4 to 19 7 on 801,400 head at the farms was reported during the 24 hour period ending 10 30 Friday morning. Largest percentage of the sales were at 19 to 19 4.

Demand was very good for the light supplies. Estimated slaughter for the week end by eastern shore processors was 718,000 head compared with 727,000 head last week end.

The Delmarva broiler-feed ratio for the week ending January 12 was steady with the previous week at 3 6. Broilers averaged 16 77 and mash cost the grower $94. per ton. The ratio for the comparable week a year ago was 4 0 when broilers brought 17 73 and mash cost the grower $89 70 per ton.

Georgia reported prices of 17 6 to 18 3 on 64,800 head sold at the Georgia Poultry Exchange during the period Live offerings cleared close and were often short of needs Estimated slaughter for the week end by Georgia processors was 1,602,000 head compared to the 1,707,000 head last week end

FROM WHERE WE STAND -
What Could I Do? My Neighbor Sold

"I have enough trouble keeping up with producing the food. How can I be expected to help sell it?" a dairyman told us recently

"What could I do? I intended to hold my tobacco for a better price, but all my neighbors sold. I thought I had better sell or I might be left holding my crop when the price went lower." It almost seems this is a broken record about this time every year.

"Is it true that another big company is contracting laying hens in the county?", was the question of a poultryman at a meeting recently.

We sympathize with the farmer who has a crop and is at the mercy of a few bidders for the perishable products of his year's toil.

But just whose job is it to sell agricultural production? Just how much responsibility does the farmer have in helping to maintain markets for his crops? How much right has he to interfere in a function of the food industry remote from the actual production of the commodities of trade.

At a New Year's reception for members of the press in the office of Secretary of Agriculture, Freeman, the Secretary had this to say, "During this last year, national consumption of milk—which scientists have called nature's most perfect food—dropped two to three billion pounds below the consumption levels of 1960. No one knows why, although speculation is that the current vogue of diet consciousness is largely responsible.

"This is a situation which I view with alarm, and it is the main reason why I am serving milk and dairy products at this New Year's reception for members of the press . . . .

"America . . . is the best fed nation in the world. Our people have the highest calorie diet of any country today. Our children are bigger, on the average, than children in other nations and each of us can expect to live longer than our parents.

"One of the contributing factors over the years to the health of the American people has been the high consumption of milk and dairy products.

"Since 1955, however, per capita total consumption.

"This past year, however, the Department (of Agriculture) estimates that total consumption will drop three consumption has been trending downward, but the increase in population has compensated for this in terms of billion pounds under 1960 levels — the first interruption of the steady upward trend which began in 1953."

Others are concerned about this lack of appetite for wholesome foodstuffs being exhibited by the American consumer.

A new challenge to food manufacturers, aimed at stimulating greater consumption of eggs will be unveiled at the Poultry and Egg National Board's 22nd annual meeting in Chicago March 19 to 21.

Prepared by the steering committee of the New Products Development ment Committee of PENB the publication will feature four new products and serve as a supplement to PENB's "Profit Making opportunities in the 60's With Eggs" which contains data on eight new egg products and two meat products from the hen.

In addition, PENB has carried out an extensive advertising campaign in periodical Medical Journals which go to physicians and others in the field of nutrition.

It seems to us that there are three ways of dealing with the problem of marketing farm production. We can sit and moan that we have no time or ability to help market our products, or in other words, we can hope someone else will do something about it. We can point out the danger of not acting—recognize the danger without offering any solution. Or we can get some of our money and effort into a constructive campaign of advertising and education on the merits of good wholesome food.

We leave it to you to decide which course will bring the results we are all seeking.

How does it look from where you stand?

A Century Of Agricultural Leadership

Abraham Lincoln dipped his quill and affixed his signature to a bill in the year 1862.

The bill became a law stating, "Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby established at the seat of the government of the United States a Department of Agriculture, the general designs and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of that word ."

In August of last year, another president put his signature to another proclamation which has importance to all of us in Lancaster County. The proclamation reads, "Now, therefore, I, John F. Kennedy, President of the United States of America, do hereby designate the year 1962 as the United States Department of Agriculture Centennial year; and I request the Department of agriculture to plan and to participate in appropriate activities recognizing the anniversary to the end that the centennial may serve as an occasion to commemorate the contributions of agriculture to the health and welfare of every citizen, to the national well-being, and to the development of emerging nations."

● Soil Conservation
(From page 1)

servation farmer in the county in 1956.

Funk is also first vice president of the state association of Soil Conservation District Directors

Directors also reelected Henry Hackman to the office of vice chairman, and Henry Givler to the office of secretary-treasurer

In other business, directors made tentative plans for the annual meeting to be held on March 6, an FFA soil judging contest in May, County plowing contest in July, and the soil conservation field day in August. Directors also plan to hold several watershed meetings with the aid of associate directors during the year

Nine new conservation agreements were approved at the meeting Requests for conservation plans from six landowners to cover a total of 537 acres were from the following: Ellis K Mentzer, New Holland R2, 90 acres in Earl Twp, 77 acres in Earl Twp , 81 acres in Earl Twp , 60 acres in Earl Twp; Harvey E Sauders, New Holland R1, 71 acres in East Earl Twp ; Aaron H. Martin, Denver R1, 43 acres in Brecknock Twp ; Henry Lauver, Ephrata R2, 37 acres in Ephrata Twp ; Frank J. Ludwig, New Holland R2, 24 acres in Earl Twp. The signing of these agreements brings the total since the district was formed to 2,023 cooperators

The goal of new cooperators for 1962 was set at 100.

COLD BREAKERS

Two layers of fabric are warmer than one, reminds Bernice Tharp, Penn State extension clothing specialist. A tightly woven cotton cloth can serve as an excellent windbreaker Lined with a nap or pile fabric, such a garment is warm, lightweight, and comfortable to wear When the cotton fabric is treated for water repellency, it has the added advantage of repelling rain and snow

● McSparran
(From page 1)

be the election of directors to serve a three year term. Directors whose terms expire in 1962 are Mark Myer, president; Charles D. Warfel, secretary; Glenn H. Herr, auction manager; Jay R. Greider, Noah W. Kreider, Sr , and H Raymond Stoner.

God Is Spirit

Lesson for January 21, 1962

THE Greek language, in which the New Testament was at first written, has no way of expressing our English "indefinite article" a or an. Consequently the two sentences "God is a Spirit" and "God is Spirit" would be exactly the same in Greek. So then, what did Jesus say to the Samaritan woman? Did He say "God is a Spirit" or "God is Spirit"? This is one of these places where Bible translation can't depend on the words only, for here two different translations would be equally correct, so far as the words go. One reason why practically all contemporary translations say "Spirit" in John 4:24 is that saying "God is a Spirit" might give the idea that God is just one among many spirits. God is Spirit fits better with all that the Bible tells us about God.

Dr. Foreman

What Is God like?

The central meaning of "God is Spirit" is that God's nature is spirit. Water is liquid, earth, water, fire and air are physical; God is spirit. It is very hard to think clearly what this means, because we have never seen spirit by itself. We experience what it is to be spirit, ourselves; for man is partly body, partly spirit. Yet in ourselves spirit never is felt alone. It is extremely hard to be certain at any point in our experience what elements are "spirit" and what elements are physical, material. We know what spirit and matter are in close combination; we can observe matter without spirit every time we look at a rock or a raindrop. But spirit, pure and unmingled? Let us try to speak of a few of the meanings that Christian thinkers have seen in this tremendous saying, so simple and yet so profound.

No likeness of anything

Moses did not try to tell the Israelites that God is spirit. What he did say was something simpler. The people of God were forbidden to make any image or likeness of anything at all, in water, earth or air. The Israelites alone, among the people of the ancient East, had no status nor pictures of their God. God is not like any physical thing. Nothing that can be seen with the natural eye looks like God. Now this is very important. If God had some kind of body, if God were as dependent on his body as we on ours, then like all bodies, his would have to be at some definite location in space. You could point straight at God (let us say) at noon by the clock, but because of the way the earth spins, at midnight you would have to point in the opposite direction. Nothing that has a body can be in more places than one at one time. Everything that has a body, or is a body, has to move or be carried, from one place to another place. But God is everywhere all the time. All places are "here" to him. This could not be true unless God is spirit.

Judgment and consolation

This Christian belief (which we owe directly to our Master) that God is spirit, is not just a difficult doctrine. It is extremely practical, and that in two ways. For one thing, you cannot go anywhere and shut God off from following you. He does not need to follow you. He is always there. No door can be closed against him. This means that nothing escapes His eye. No recording angel is needed to keep your record. At the final judgment there is no need to summon witnesses, no wondering if they are telling the truth. God does not depend on eye-witnesses. His judgment is just because He is always at the scene of every crime . . . Crime? Yes, at the scene of every sin too. In a human court a man may "get by with murder." He may build up a reputation he does not deserve. But no man can surprise God; your reputation with Him is no better than you are.

The other very important practical bearing this truth has is that God is present in our darkest hours. We may be too ill to visit the bedside of a dying loved one We may arrive too late for a funeral. But God is never too late, the high God, the only God there is,—He is always there. We are never alone, and we need never feel alone. We may know that no human sympathy quite penetrates to the inside of our hearts; but God knows us from the inside as well as from without.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S A. Released by Community Press Service.)

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO WASH DAIRY EQUIPMENT PROPERLY — Washing compounds work well in some water supplies but with others they may not be compatible Usually when the product is mixed with water according to directions, there is no cloudiness or sediment and it is satisfactory for use Dairy equipment should be rinsed, soaked in washing solution, brushed, rinsed again and stored dry; Keep water temperatures between 100 and 120 degrees F Just before using, rinse with a sanitizing solution.

TO BE ALERT FOR PIG PNEUMONIA—The season for virus pig pneumonia is here and all swine producers are urged to be on the alert for the trouble Symptoms include coughing, scours, sneezing, listlessness, and loss of flesh. Death losses may not be high but poor gains and low feed returns will result in heavy financial losses. In case of doubt, producers are urged to contact their local veterinarian.

TO BE CAREFUL IN BUYING—Many farm purchases will be made in the next few months All farmers are urged to be extremely careful about buying from strangers or buying from misleading advertising. Bargain offers either from a traveling salesman or from an advertisement should be accepted cautiously and the name and honesty of the company investigated before the purchase is completed Special offers from strangers that insist upon cash payment have often resulted in mis-representation and a very expensive experience All farmers are urged to deal with reputable concerns of known location and service, or have the product and company cecked before completing any deals.

TO CONTINUE CALFHOOD VACCINATION—All dairymen are reminded of the importance of trying to build resistance against Bangs Disease in the young herd of dairy cows. The recommended method of getting this resistance in a herd is to vaccinate the heifer calves when four to eight months of age. This is a free service offered by the Bureau of Animal Industry through all veterinarians. All dairymen are urged to continue this important practice for improved herd health in the future.

● Tobacco

(From page 1)

else on my ground, besides burley, that will make more." Smith raises 4½ acres of burley on his farm of over 300 acres

Another farmer, Thomas Smith, says he would rather have more burley tobacco, but since that is impossible the cigar filler tobacco takes up his extra labor and barn room and "makes a little money"

Farmers said they grew from 1,000 to 1,500 pounds per acre and received about 25 cents per pound for the cigar filler tobacco in comparison to the 65 to 68 cents per pound for burley.

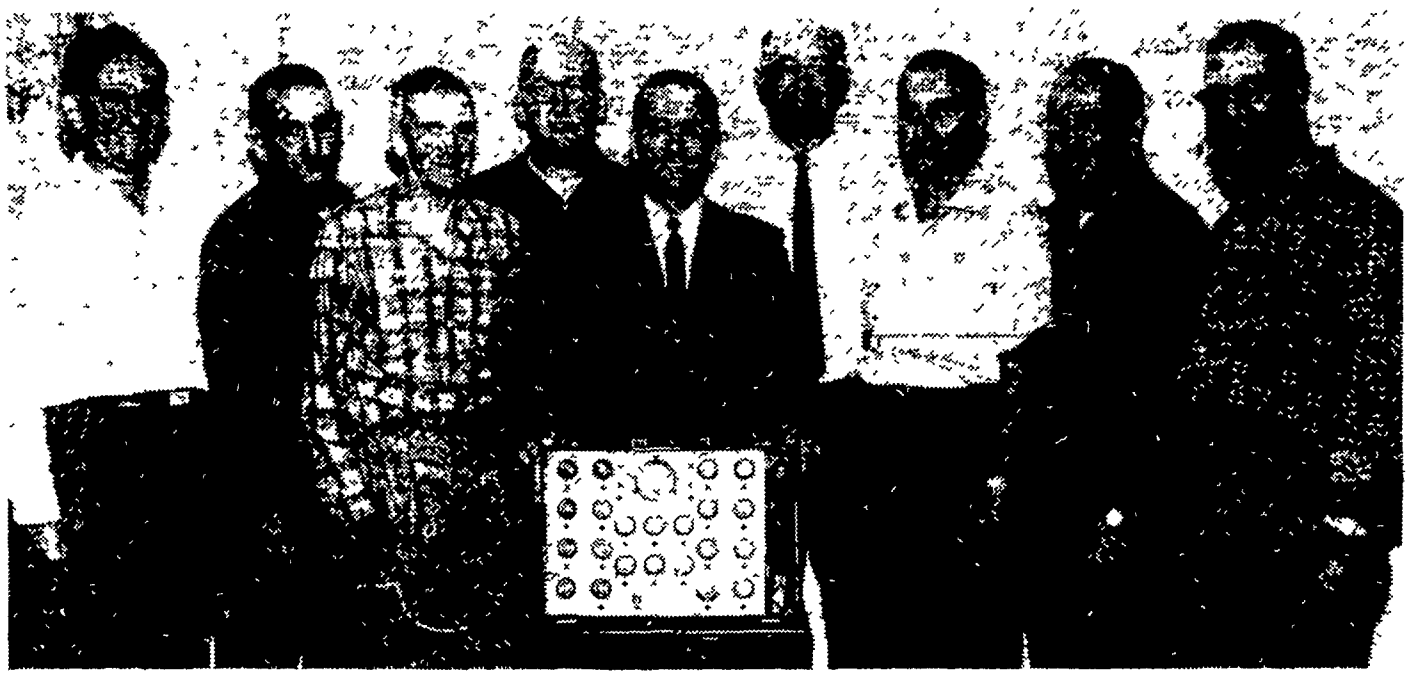
Lancaster County farmers contacted by Lancaster Farming this week were up in arms over the statement that urban encroachment had caused tobacco acreage to dwindle. One long-time tobacco farmer said, "I have never believed in acreage controls, but if this is what we are up against, I don't see any other way out"

With the date of the referendum not yet set, several other farmers expressed similar feelings, but one grower expressed the belief that Lancaster County tobaccomen would again turn down acreage controls in the hope of finding another solution to the problem

Introducing

TEN MEN and THE COWculator

TEN Farm Bureau Feed Servicemen, each one carefully trained in the accurate use of the Caskey COWculator, are ready to assist you in realizing the goal of every dairyman - - to feed each cow in your herd for Maximum Profit!



Pictured left to right, Arthur Shenenberger, Charles McCrabb, Eugene Rineer, Harold Geib, John E. Wolgemuth, Assistant General Manager & Sales Manager; Melvin Koser, Harold Kinsey, Allen Mackey and Victor Denlinger Absent when the photo was taken, John McCormick, Feed Sales Supervisor, Penna. Farm Bureau Co op Ass'n.

SEVEN REASONS why more and more leading Lancaster County Dairymen are switching to the FARM BUREAU Dairy Feeding Program!

1. MAXIMUM PROFIT FEEDING helps you obtain the greatest possible income over feed cost. It incorporates the use of a revolutionary electronic brain called the Caskey COWculator.
2. INTRODUCTION, of the now famous, DARI-PAK Dairy Ration. This completely balanced, fully fortified and economical dairy feed is available in tasty coarse texture or pellets. Choose from 14% or 16%. It's an outstanding milk maker.
3. DARI-PAK PELLETS are firm - - palatable, too. NOW . . Dari-Pak Pellets have full 10% Molasses per ton. Minimum amount of fines assures complete clean-up.
4. GRAIN EXCHANGE PROGRAM gives you full retail price for your home grown grain. This program, designed with you in mind, makes it possible to change from custom grinding-mixing to a completely balanced ration without losing the advantage of your own grain.
5. LARGE-USER PROGRAM means increased benefits to dairymen equipped to handle 5, 7 or 8 ton deliveries. Means lower production costs - - higher profits.
6. STEPPED-UP SERVICE PROGRAM is geared to meet today's increased needs. Carefully trained Fieldmen are available to assist you in planning a profitable feeding program. Full time Feed Specialist added to our staff to better serve you.
7. COOPERATIVE SAVINGS are shared by users in relation to purchases. It's your business - - your profits, too.

Take time to discuss "Maximum Profit Feeding" with your FARM BUREAU FIELDMEN — you'll Be Glad You Did.

Cooking For A Crowd

By Mrs. Richard C. Spence

Once in a great while it is our lot to have to cook up something to serve to twenty people or more Today we have some quantity recipes you might like to keep on hand for just such an occasion—main dishes and desserts

CASSEROLES are always a sure winner when cooking for a crowd.

TUNA-VEGETABLE CASSEROLE

18 eggs
3 cups milk
1 teaspoon salt
1 tablespoon pepper
1 pound saltine crackers, chrushed
2 cups chopped onion
4 pounds canned tuna, flaked
2 quarts mixed vegetables, (frozen, canned or leftover)

Beat eggs with milk, salt and pepper, using wire whip at high speed for one minute. Stir in crushed saltine crackers, onion, tuna and vegetables Spread in greased 12x18 inch pan Bake in moderate oven (350 degrees) one hour or until firm in center. Cut in squares Serves 20

* * *

CURRIED EGG-CHEESE BAKE

36 eggs
1 teaspoon salt
2 teaspoons pepper
1 tablespoon curry powder (or to taste)
1 cup butter or margarine, melted (½ pound)
1 pound saltine crackers, Crushed
2 cups cheddar cheese, grated (½ pound)

Beat eggs with salt, pepper, curry powder and butter or margarine, using wire whip at high speed for one minute Stir in crushed saltine crackers Pour into well-greased 12x18-inch pan Sprinkle with grated cheese. Bake in moderate oven (350 degrees) 20 minutes or until firm. Cut in squares. Serves 20.

* * *

These Tuna Croquettes are easy and different for quantity cooking

TUNA CROQUETTES

2 pounds, 10 ounces tuna, flaked
2 pounds saltine crackers, crushed
2 10½-oz. cans condensed cream of mushroom soup
2 10½-oz. cans condensed cream of celery soup
1 tablespoon basil
2 teaspoons black pepper
4 eggs
1½ pounds process American cheese

Mix crushed crackers, tuna, soups, basil, black pepper and eggs, Chill. Cut cheese into 1-inch cubes. Shape tuna mixture into croquettes around cheese cubes. Bake in moderate oven (350 degrees) 25 minutes or roll in cracker crumbs and fry in deep fat (360 degrees) until golden brown, about 3 minutes. 25 servings.

* * *

Creamed dishes are always nice to serve to a group Keep it warm in your favorite chafing dish during the serving period.

CREAMED LOBSTER

½ pound (1 cup) butter or margarine
1 cup chopped onion
1 cup chopped green pepper
1 cup minced parsley
3 pound 2 oz. can condensed cream of mushroom soup
1 quart light cream
½ dozen egg yolks, beaten
3 pound 2 oz. (7 cups) lobster, flaked
¾ teaspoon nutmeg
½ teaspoon cayenne pepper

Melt butter or margarine, add onion, pepper and parsley. Cook gently for about 10 minutes Add soup, cream and egg yolks. Blend well. Add lobster and seasonings. Cook, stirring frequently until mixture thickens, about 45 minutes. Serve over crackers. 25 servings.

* * *

FISH CHOWDER

½ pound (1 cup) butter or margarine
2 cups chopped onion
2 pounds potatoes, diced
2 tablespoons salt
2 teaspoons pepper
1 quart water
3 pounds fish fillets, cubed
1 gallon milk
1 teaspoon oregano

Saute onions in butter or margarine. Add potatoes, salt, pepper and water and cover. Cook until potatoes are nearly done Add fish and simmer until fish is flaky Add milk and oregano. Heat but do not boil Serve with saltines or oyster crackers. Serves 25.

* * *

CORN CHOWDER

½ pound (1 cup) butter or margarine
½ pound (2 cups) onion, chopped
2½ pounds potatoes, diced
2 tablespoons salt
1 teaspoon pepper
1 quart water
4 pounds 8 ounces (six 12-ounce cans) corn, whole kernel
1 gallon milk

Saute onions in butter or margarine. Add potatoes, salt

and pepper and water to cover. Cook until potatoes are nearly done. Add corn and milk. Heat but do not boil. Serve with saltines or oyster crackers. Serves 25.

* * *

Some desserts for the crowd—

NO-BAKE BROWNIES

3 cups evaporated milk
9¼ ounces (6 cups) miniature marshmallows
3 6-oz packages semi sweet chocolate pieces
1½ cups sugar
¾ teaspoon salt
3 tablespoons butter or margarine
2 tablespoons vanilla
2 pounds graham crackers (crushed)
3 cups chopped walnuts

Cook first five ingredients in 6-quart kettle over medium heat until chocolate pieces and marshmallows melt. Cook and stir to a full rolling boil and boil ten minutes Remove from heat and gradually stir in remaining ingredients Press mixture into a buttered 12x18 inch pan Chill one hour or until set. Store in refrigerator until served. Makes about 54 squares.

* * *

FRUIT SQUARES

3 10¼-oz. packages shortbread cookies, crushed
10½ ounces flaked coconut
18 ozs. pecan halves
2½ cups pineapple, (do not drain)

Crush cookies, using mixer with paddle at low speed. Add remaining ingredients; blend well. Press into a buttered 12x18 inch pan. Chill thoroughly. To serve cut in squares. Makes about 54 squares.

* * *

If your group or organization is having a bake chiffon pies make a good saleable item.

LEMON CHIFFON PIE FILLING

24 egg yolks
3 cups sugar
2 teaspoons salt
2½ cups lemon juice
2 ounces gelatine
1¾ cups cold water
2 tablespoons grated lemon rind
24 egg whites
2¼ cups sugar

Beat egg yolks with sugar, salt and lemon juice. Cook over boiling water until mixture starts to thicken. Soften gelatine in cold water and stir into egg yolk mixture. Add grated lemon rind. Cool until partially set. Beat egg whites with sugar. Fold in egg yolk mixture gradually. Divide mixture into six 9-in. pie shells. Chill.

CRUST

Thoroughly mix 2¼ pounds graham cracker crumbs, one pound softened butter or margarine and two cups sugar. Divide into six 9-in. pie plates and press firmly against bottom and sides. The easy way is to press crumbs into place using an 8-inch pie plate. Bake at 375 degrees 8 minutes. Cool and fill.

VARIATIONS. 1. Apricot Lemon Chiffon: Stir in four cups canned apricot halves drained and chopped. Garnish with apricot halves and a sprinkling of flaked coconut. 2 Pineapple-Lemon Chiffon: Stir in 6 cups drained, crushed pineapple. Garnish with pineapple tidbits and whipped cream 3. Strawberry-Lemon Chiffon: Stir in four cups frozen strawberries, thawed and drained. Garnish with whipped cream and whole fresh strawberries.

* * *

GINGER REFRIGERATOR PUDDING

2 pounds old-fashioned gingersnaps
¾ pound butter or margarine (1½ cups)
2 pounds powdered sugar
8 eggs
3 cups heavy cream
1 quart pineapple tid-bits, drained
8 bananas, sliced
8 ozs. walnues, chopped

Roll gingersnaps or put through the coarse screen of chopper to make crumbs. Cream butter or margarine and sugar together. Add eggs and beat until fluffy. Whip cream. Fold in pineapple, bananas and nuts. Butter a 12x18x2-inch pan. Cover bottom of pan with about ⅓ of crumbs. Carefully spread sugar and butter mixture over crumbs. Add another ⅓ of crumbs. Spread fruit mixture carefully over this layer and sprinkle with remaining crumbs Chill overnight Cut into 48 squares.

* * *

LEMON REFRIGERATOR CAKE

2 quarts plus 1 pint boiling water
18 ounces lemon flavored gelatin

Best Food Buys

Weather Turns Surplus To Scarcity

The aftermath of that recent cold wave which reached far into the vegetable and citrus growing areas of Texas and Florida brings disheartening news for the budget-minded foodshopper Surplus was turned to scarcity by the difference of a few degrees on the thermometer and as a result higher prices prevail on many of our favorite fresh vegetables, reports Tom Piper, Penn State Extension Marketing Agent

Texas was hit hardest Their fresh-market citrus crop was wiped out; crops of beets, broccoli, cabbage, carrots, cauliflower, lettuce, spinach and onions were severely damaged and losses were heavy. All spring crops — sweet corn, potatoes, tomatoes and green peppers— that were up will have to be replanted, delaying the date of their readiness for market.

Damage in Florida was confined primarily to the tender vegetables and higher prices are expected on sweet corn, cucumbers, parsley, spinach and leafy greens Loss of the Texas crop will boost demand for the production from Florida and prices will be bid higher Onion prices are higher on prospects that the spring crop will be reduced in size

Potatoes remain in plentiful supply and a clear-cut good buy Celery prices remain firm; lettuce will be higher on cold weather influence.

Although about 10 percent of the Florida citrus crop was damaged, the bumper crop should continue to provide grapefruit and oranges at reasonable prices Apples remain in plentiful supply with last year's crop being 13 per cent above average Banana prices are higher on light supplies

Meat for the main dish is in plentiful supply, and featured cuts should be especially attractive with higher produce prices in prospect Choose among beef steaks, roasts and ground beef or pork roasts and chops

Milk and dairy products offer continual economy for the food value received The nation's dairy herds produced over 317 quarts of milk for each of us last year and another increase in production is forecast for 1962

Eggs provide an economical source of protein and by all indications, will do their part in keeping family food costs from rising in 1962 Recent egg production has been about 4 per cent above last year and prices are around 20 per cent lower At 60 cents per dozen, the cost per egg is only 5 cents And nutritionists rate 3 eggs the equal of a normal meat serving in protein

● Cooking for Crowd

(From page 7)

½ cup grated lemon rind
7 pounds cream cheese
2¼ pounds (5 dozen) packages coconut bars

Dissolve gelatin in boiling water Stir in lemon rind and chill until partially set Soften cream cheese in mixer at low speed Add gelatin mixture gradually, beating until smooth after each addition Cover bottom of a 12x-8x2 inch pan with 20 cocoanut bars Spread half of the cheese over cookies and top with 20 cocoanut bars Spread remaining cheese mixture over cookies and top with remaining cocoanut bars Chill overnight Cut into 48 squares Garnish each square with a maraschino cherry if desired

Shady Vista Burke Velvet owned by Earl L. Umble, Atglen, produced 13,869 lbs milk and 350 lbs butterfat butterfat in 297 days on twice daily milking as a 7-yr-old. She is a registered Holstein.

(From page 1)

dressing plant at Coatesville began piling up heavy losses. The board closed the plant and began exploration of the possibilities of merger with another cooperative

Proposals were solicited from both Farm Bureau and the Eastern States Farmers Exchange.

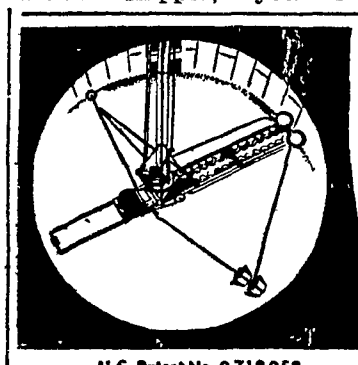
Farm Bureau submitted a proposal to acquire the Coatesville Cooperative in an exchange of stock program Eastern States proposed to, "assist through an investment of a minimum of $50,000 in Producers Cooperative Exchange The exact amount, in case a higher amount would be more satisfactory, and the form of investment could be determined upon acceptance of the principle."

On December 8, last year, the board of directors of Producers Exchange voted to accept the Farm Bureau proposal, and the decision was presented to the membership at the annual meeting of the cooperative on December 12. At that time, members instructed the board to draw copies of each proposal and mail the copies to all stockholders

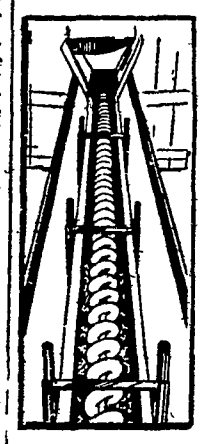
Copies of the resolutoons were mailed during the first week of January with a letter of explanation from John H. Herr, cooperative secretary.

Herr reminded members, "Whether or not you are an active shipper, you still have a responsibility as a stockholder."

January 30 has been selected as alternate date if the meeting should have to be postponed because of bad weather.



U.S. Patent No. 2,719,058



VanDale*
MOST COPIED
SILO UNLOADER

"Imitation is the sincerest form of flattery," and nowhere more true than in the field of automatic silage unloading. VanDale is the most copied, most sought after silo unloader in the history of mechanized choring. VanDale is first in production, sales and field experience. Every notable design improvement in the silo unloader industry has been made, by VanDale, for the benefit of the farmer. Time-tested, farm-tested and proved, VanDale pound for pound and dollar for dollar is your best value—by far—for the money.

AUTOMATIC FEEDING TOO!

Combine automatic feeding with your silage unloading. Ask about the VanDale Automatic Bunk Feeder.

VANDALE IS DESIGNED, ENGINEERED AND MANUFACTURED TO DO ONE JOB BETTER THAN OTHER SILO UNLOADERS:

Unload corn or grass silage, packed or frozen, from upright silos. In 3 and 5 H.P. Heavy Duty and "Thrower" models, with or without optional Booster unit.

*VanDale is the registered trade-mark of VanDale Farm Machines, Inc.

DHIA

(From page 1)

terfat and 14,556 pounds of milk, and the herd of Titus M. Hurst, Lititz R2, making 554 pounds of butterfat in 14,882 pounds of milk.

A total of 51 herds in the association had averages of 500 or more pounds of butterfat for the year Lancaster County last year had 39 herds with averages of better than 600 pounds, Carl Hollinger, state DHIA fieldman, told the 500 members present at the noon meeting in the Hotel Brunswick He said Los Angeles County, California, was high in the nation with 53 herds over the 500 pound mark.

Hollinger said during December, Pennsylvania University processed 240 Lancaster County herd records with just a little over 15,000 cows. This, he said, is just 21 per cent of the cows in the county on test, but the state average is 19 per cent

He said Pennsylvania set an all time high for production last year with all cows on test averaging 10,813 lbs of milk and 423 pounds of fat Potter lead all counties with an average of 482 lbs of fat while Luzerne had an average of 460 pounds Lancaster County ranked 28th among the counties with 425, or just two pounds above the state average.

In other business, members elected three new directors to three year terms They are John J Oberholtzer, 171 Newport Road, Leola, Irvin Musser, Mount Joy R1, and Kenneth Skiles, Narvon R2

Jay Landis, president of the association was toastmaster

Brucellosis In State Dairy Herds At Lowest Rate On Record

Harrisburg — The percentage of brucellosis infected Pennsylvania dairy cattle dropped to 011 per cent, an all-time low, during the six month ended October 25

The highly encouraging report, revealed by Dr P V Clarkson, chief of the division of brucellosis, Bureau of Animal Industry, State Department of Agriculture reflects a trend that began almost immediately when the brucellosis control program was initiated some years ago and has been most marked in the last seven years

Contrasting the results of the brucellosis test for the period March 27 to October 25 of this year with that of the test from September 1, 1960 to May 4 of this year, the report shows that the number of suspect herds dropped from 268 to 192 the number of herds suspicious to the milk ring test — the first phase in screening herds —declined from 76 per cent to 54 per cent; the percentage of suspicious herds which revealed infection on blood test, which determines absolute proof of infection, dropped from 66 to 38, and the percentage of suspicious herds which revealed infection on blood test also declined from 24 6 per cent to 19 7

The testing period covered all commercial herds that produce milk for human consumption in the Commonwealth

In the six-months period the number of dairy herds in the Commonwealth decreased from 35,000 to 34,949 But while the number of herds went down by 51, the number of cattle in the herds increased by 52,889, from 901,258 to 954,147

This also reflects a continuing trend—a decline in the number of herds but an increase in the number of head of cattle

Dr Clarkson also said Clearfield County was joining two other counties as "free area" counties This Status is achieved only when cattle infection is less than 2 of one per cent and herd infection is less than one percent

"This is very gratifying," said Secretary of Agriculture William L Henning "The goal is every county a free area"

The other two free area counties are Philadelphia and Monroe

The four poultry virus diseases for which vaccines are available are Newcastle, fowl pox, bronchitis, and laryngotracheitis Each is caused by a different virus.

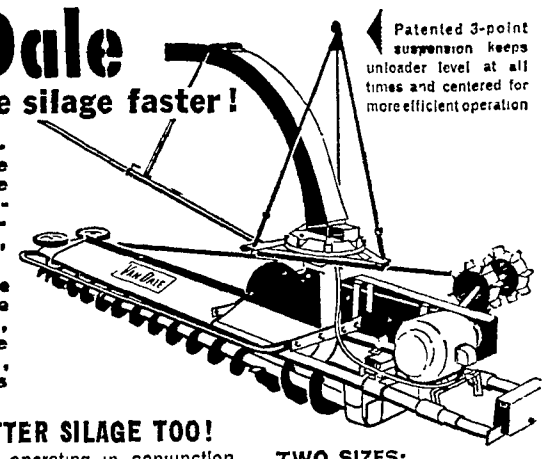
Get the BIG silo unloader value!

VanDale
Delivers more silage faster!

Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation



- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!
The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 16'
Heavy Duty—for silos 12' to 30'

Imported Meats To Be Marked

Beginning March 1, consumers of Federally graded meat will be able to tell if what they buy is of foreign origin The U S Department of Agriculture today announced an amendment to Federal meat grading regulations which will require that all imported meats be marked as such.

The original proposal called for the amendment to go into effect Jan. 1, 1962, but in order to permit handlers of imported meats to obtain suitable marketing equipment, the date was delayed until March 1, 1962.

The Amendment will: 1. Require imported meats to bear an approved mark identifying the country of origin on most of the major retail cuts if the meat is to be Federally graded; 2 Require the applicant for meat grading service to notify the meat grader if the carcass or the wholesale cuts offered for grading are of foreign origin; and 3. Provide for denial or withdrawal of meat grading service from any applicant who knowingly fails to provide the required information regarding imported meat.

● Yorkshire

(From page 1)

the pens of littermate gilts will hold the spotlight.

Exhibition of bred gilts will begin on the following day at 8 a m and official registration is set for 9 a m. A short speaking program at 10 o'clock will be followed at 10.30 by the type classes and judging contest with seven classes to be placed. Showing of the fall boar classes will round out the competition on the 26th.

Saturday, January 27 will see the fall gilt show at 8 a. m. with the results of the slaughtered animals and announcement of winners. The sale of the prize winning Yorkshires at 12 noon will bring the conference to a close.

PIONEER VIG-R-CALF

Costs 40-60% Less to Feed Than Milk!

PIONEER VIG-R-CALF
Milk Replacer

SAVES MILK... 50 lb. size saves 4 cans milk in 4 weeks.

EASY TO FEED... Just mix with warm water... STAYS MIXED!

INCREASES GROWTH . . . Calves average up to 2 lbs. per day gain in growth!

CONTROLS SCOURS . . . Scientific blending of quality ingredients and antibiotics helps you control scours!

SAVES MONEY . . . Costs 40-60% less to feed than milk!

Forest Fires Lowest Ever

HARRISBURG — Forest fires consumed fewer acres of Pennsylvania forest lands in 1961 than in any other year, Forests and Waters Secretary Maurice K Goddard announced today.

"The 3200 acres burned in 1961 amount to less than one-half of the previous low record set in 1956 when 6940 acres of forests went up in smoke," Goddard stated.

Goddard also announced that the figure of 552 forest fires, accounted for in 1961, compares almost exactly to the previous low of 559 fires in 1956.

"Last year's forest fire record shows that in addition to keeping down the number of fires we have improved our techniques of putting them out," Goddard said.

Generally, forest fires in 1961 were quite small with only one fire burning more than 100 acres. One of the State's forest districts reported 101 fires during the year which burned only 320 acres.

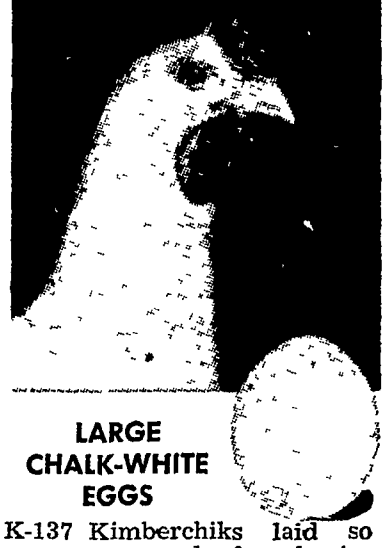
Hunters caused more forest fires than any other agent, having been responsible for 150 fires in 1961, reported H. B. Rowland, the Department's Chief of Forest Protection. After hunters, incendiaries were the second largest cause with 80 fires, and railroads were third, causing 75 fires.

PREVENT DAMAGE — —

Cottontail rabbits often cause winter damage to young trees and shrubs by chewing the bark. Robert Wingard, Penn State extension forestry and wildlife management specialist, explains the home owner can prevent damage by using hardware cloth cylinders, layers of heavy waterproof paper or aluminum foil.

Consistent Top Egg Production from...

HUBBARD K-137 KimberChiks



LARGE CHALK-WHITE EGGS

K-137 Kimberchiks laid so many eggs and of such size that they had the **highest income producing ability** among the stocks entered in the 1959-60 Random Sample Tests, according to the U. S. D A summary.

FIVE YEAR WINNER: K-137 Kimberchicks had the highest income over feed and chick cost in the California Random Sample Egg Laying Test for the five-year period from 1956-61, another indication of their consistent performance.
